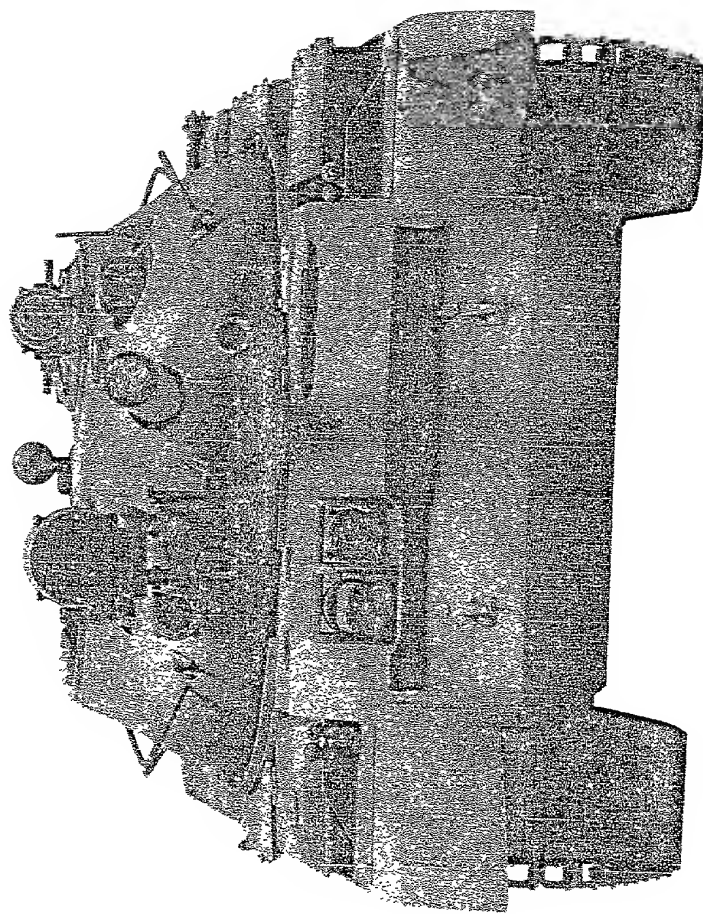

Fig. 6

A black and white illustration of a fox in a running pose, enclosed within a decorative, irregular border. The fox is depicted in profile, facing right, with its body low to the ground and its tail slightly curved. The background is a dense, stippled texture. The entire illustration is framed by a thick, dark, irregular border that resembles a hand-drawn outline.

A black and white photograph of a fossilized animal track, likely a dinosaur, showing a long, slender body and a long tail, preserved in a rock matrix. The track is oriented horizontally, with the head to the left and the tail to the right. The body is relatively straight, and the tail is long and tapers slightly. The track is set against a dark, textured background of the rock matrix. The entire fossil is framed by a white border.
